

PRACTICAL-3

AIM: Create a web page using HTML frame as shown in following figure.
Create different Html pages and load pages in appropriate sections.

1.header.html

2.nav.html

3.body.html

4.footer.html

Header.html

```
<html>
<body>
<p><center>[Header Section]</center></p>
</body>
</html>
```

Navigation.html

```
<html>
<header>
<body>
<p>[Navigation Section]</p>
</body>
</html>
```

Body.html

```
<html>
<header>
<body>
<p>[Body Section]</p>
</body>
</html>
```

Footer.html

```
<html>
<header>
```

```
<body>  
<p><center>[Footer Section]</center></p>  
</body>  
</html>
```

OUTPUT:

[Header Section]	
[Navigation Section]	[Body Section]
[Footer Section]
